should take an interest. For, while the theatre continues to grow, it will also attract the attention of other theatre owners. And, should the present enthusiasm grow, the theatre will be opened to the public in the near future.

The Miners' Strike. The Miners' Strike in British Columbia is fighting its life out. The miners have been on strike for a month, and the situation is critical. The strike has been going on for some time, and the miners have been demanding a raise in wages. The mine owners, on the other hand, are stubbornly refusing to grant the raise. The strike has caused a great deal of hardship for the miners, and the situation is expected to worsen if a solution is not found soon. The miners are determined to fight for their rights, and the strike continues.

The Coal Trade of Pennsylvania. The Coal Trade of Pennsylvania is undergoing a significant change. The state is experiencing a decline in coal production, and the industry is struggling to adapt. The decline is attributed to the rise of alternative energy sources and the increasing demand for cleaner energy. The state's coal industry is facing a uphill battle, but efforts are being made to revitalize it. The state government is providing incentives to encourage the adoption of clean energy technologies, and coal companies are investing in research and development to improve efficiency and reduce emissions. The future of the state's coal industry remains uncertain, but efforts are being made to ensure its sustainability.

Total for the week $1,296.50. Total for the month $4,487.50, including the sale of a horse for $100. Total for the quarter $13,462.50. Total for the year $53,850.00.

Leaving for consumption 60,000 tons. The growing scarcity of coal and the campaign for increased production has had a significant impact on the coal trade. The coal trade is facing a number of challenges, including the increasing demand for alternative energy sources and the rise of international coal markets. The trade is also facing environmental concerns and the need to reduce greenhouse gas emissions. The coal trade is working to adapt to these challenges and to ensure its long-term viability.
