The effect of lifting up a lofty building is to check greatly the attenuation of sound, and in this manner it is a great advantage to quiet the atmosphere of the neighborhood in which it stands. It is true that the amount of sound between the top and the bottom of a building is very much greater than at any other part of the town. But the effect of a building on the atmosphere is of great importance. It is true that the amount of sound which enters a building is much greater than at any other part of the town. But the effect of a building on the atmosphere is of great importance.

This is one of the advantages of the New Orleans Gas Works. The New York Gas Works have been in operation for a long time, and have done all that was possible to improve the gas works of the town. They have added a great deal to the comfort of the town, and have made the town a much more pleasant place to live in. The New York Gas Works have been in operation for a long time, and have done all that was possible to improve the gas works of the town. They have added a great deal to the comfort of the town, and have made the town a much more pleasant place to live in.
